The UW ECHO in Student Health and Wyoming Telehealth Network (WyTN) Invite You to Attend a School-Based Health Mini-Series

This mini-series will provide a foundation in understanding how telehealth and school-based health centers can be used to support school nurses and increase student access to health. We will examine approaches from a local, regional, and national level.

With nearly 2,000 centers nationwide School-Based Health Centers provide an innovative solution to rural healthcare. As a partnership between school districts and community health organizations, hospitals, and/or local health departments, these health centers offer a full range of age-appropriate health care services for rural youth.

Mini-Series at a Glance

ECHO Sessions

March 10, 3:45 - 5:00pm

Building School-Based Health Partnerships

April 7, 3:45 - 5:00pm

Building a Statewide Approach
